

NORBAR TORQUE TOOLS EVOTORQUE

- Norbar's Electric Torque Wrench utilises patent pending motor technology and shut off control software to give unprecedented joint control
- Correct torque output from hard through to soft joints
- Can safely be used on pre-tightened bolts as part of a joint verification process
- Torque control or Angle control is selected by the operator on the tool
- Indicator on the tool clearly signals that correct Torque or Angle has been achieved
- Third party verified sound power (Lwa) of 72.3 dB (A) and vibration level of 0.304 m/s² for exceptionally smooth and quiet power delivery
- Water and dust sealed to IP44
- Maintenance free motor (no brushes)
- Easily removable stirrup handle for balanced feel
